

# The Soul's Need for Daily Bible Study

1. The soul is always in a state of negative atmospheric pressure and so is constantly receiving information from the world. Additionally, the soul is always expelling what it contains back into the world by our mental thinking, our physical actions, and our verbalization of thoughts.
2. The inner part of the soul has a process that is constantly taking the information received (regardless of the type), and storing it for future use. Each day we must choose to take in the Word of God (WOG), the Mind of Christ (MOC) – *positive volition*, or allow the intake of information from the world system – *negative volition*. To advance in the Christian life, one must choose to take in Truth (WOG / MOC).
3. There is always the interaction with the old sin nature (OSN).
4. If one chooses to utilize spiritual fuel, but none exists, he or she will go into a panic, searching frantically for answers.
5. Over time, the consistent intake of the Word of God into the soul will remove evil and scars in the soul.
6. Whatever is in the soul will be expelled into the world.
